Working with Mac computers, especially the popular Macintosh PowerPC, requires a deeper knowledge of OS X 10.x operating systems than with Windows PCs, and you may encounter problems if you're not familiar with the latest Mac OS X. Many features in Photoshop CS5 are available on Windows PCs as well as Macs. You can read more about Photoshop at [www.photoshop.com](http://www.photoshop.com). This chapter is organized into eight chapters. You first find out what's in a name and then about the very fundamental and procedural aspects of image creation. I start in Part I with the basics, such as working with layers and applying filters. Part II is all about working with the main Photoshop window, while Part III introduces the many options you have in the Options bar. I also discuss shooting with the camera in Part IV and exposing a new style of photography in Part V. In Part VI, you move into retouching and correction: selecting, copy and pasting, cloning objects, moving items, and more. You can accomplish all of these tasks in a single layer if you like. In Part VII, you find out all about working with color. Part VIII looks at the advanced features, such as using the healing brush, cloning objects, and drawing with the pen. ## What Is Photoshop? When you think about Photoshop, what's the first word that comes to mind? Is it the main application window or the layers? Is it the filters? Well, the answer may surprise you. Let's define each of these words and find out what they mean.

You can use Photoshop, Photoshop Elements or any other image editor to create art. You can use image editing applications to correct color and make minor edits to images, such as resizing and rotating. These are important tools for manipulating images in creative ways. Adobe Photoshop and Adobe Photoshop Elements are two applications used by many image editors to edit photos. They have most of the features, from cropping to painting and retouching. Most photo software, such as Photoshop Elements can make minor image edits. For example, it can change the color of skin tones or rotate photos by 90 degrees. In this article, I'll tell you how to edit photographs with Adobe Photoshop Elements, Photoshop and any other photo editor. The Adobe Photoshop Elements tutorial will help you learn how to use the software for photo editing. Features of Adobe Photoshop Elements Adobe Photoshop Elements is an alternative to Photoshop. It's a graphics editor for photo and image editors. In Photoshop Elements, you don't have access to all the features and filters that are found in Adobe Photoshop. Q: Conditional format based on cell value in excel I am trying to set up conditional format based on the cell value. The rule is: If the cell's value contains "award" then the whole row shall be green. If the cell's value does not contain "award" then the whole row shall be red. I have a list of award in the cells as A2:A10. The conditional format applies fine if the cell value contains "award" but it applies to all cells, i.e. the whole row is green regardless of the award. Here is my formula:  
=OR(MATCH("\*award\*",IF((A1:A10="award\*",B1:B10),D1:D10),""),MATCH("\*none\*",IF(B1:B10="award\*",D1:D10),"")) A: There are two issues. In the first part of your formula, you have not indicated that you are looking at the whole table. In the second part, you are saying "show me where any part of row 1 contains the word 'award'". This will always be true, because a row is always going to contain a value of award. So in that part of the formula, you can replace it with =0. If you want to include row 1, change the =0 to =1. (This is not actually necessary, because you are using an IF function, and your formula will never evaluate to 0.) That said, what you are actually trying to find is the row that has an award, not just any part of it. So it might be cleaner to write it like this:  
=OR(MATCH(B1,IF(FIND(B\$1:B\$10,A\$1:A\$10)>0,C\$1:C\$10),0),MATCH("\*none\*",IF(FIND(B\$1:B\$10,A\$1:A\$10)>0,FIND(B\$1:B\$10,A\$1:A\$10)>0),"")) This explicitly matches "award" at the beginning of the row, and you are comparing the row to the entire table. That said, when you have only one row for the award,

The 39-year-old man is a lively speaker and a bit of a self-described “social justice bisexual activist.” Recently, he’s been singing his praises, and rightfully so, about the Pittsburgh BDSM Hotties meetup group he’s been involved in since its creation in November 2014. “It’s just one of those groups where we don’t have to create a false identity — people know it’s safe because we’ve known each other for so long. We all just love meeting up and hanging out.” After announcing in January that he and other Bisexual Meetup members would be attending a “Bisexual Social” hosted by the Pittsburgh Cyberspace Society (PCS) in March, Justin says the initial group met up and “had a really great time.” Justin tells that at the event, he “spoke quite a bit about the various social justice bisexual issues,” and that the scheduled speaker, Joey Richardson, chimed in as well. The pair bonded over their activism, and Justin was eventually able to find out Richardson’s stage name was Joey Bourbon St. in a social media search. “This was right about when I discovered that I was a bisexual man,” says Justin. On Facebook, Joey Bourbon St. posted an event invitation listing his stand-up set for the same night as Pittsburgh Bisexual Meetup’s “Bisexual Social.” And that’s where things started getting a little weird. “We kind of joked around on Facebook, saying we should do a joint set [which both of us are used to],” Justin says, noting that he and Joey Bourbon St. were both scheduled to speak at the PCS event, then post the event on Facebook for the following night. “It seemed like a mutual thing — just to have a bit of fun and do something funny at the end of the event.” It wasn’t until about three hours later, when the trio was photographed at a nearby bar while Justin was presenting Joey Bourbon St. with a card of appreciation, that Justin became somewhat uncomfortable. “I’ve been with a lot of people, and I’ve been in
