They now provide the ability to use Genesis 2 morphs in place of pre-existing head and body morphs as well as their own head and body morphs. This is done through the addition of Genesis 2 morphs to the database. Using the product line you can go to the Genesis 2 catalog for any of your Genesis 2 morphs, choose a head and body morph for that same model, and have it applied without having to remake the morphs. What you do have to do is go to your Genesis 2 tab in the admin area, choose the head morph you want, and choose your new head morph from the Add Option menu. If you have a body morph it will also give you the option of a body morph for that same model. I don't have any tutorials on this, but I'll do my best to give you the basic steps to take. For the head morph you will need to: 1) Select the head morph from the list in the Genesis 2 catalog. 2) Under the In-Use tab, change the value of Genesis 1 to 1. 3) Select the head morph from the Add Option menu. 4) Leave the Default text box blank and click Save. This will then apply the Genesis 2 morph to the head morph in your Genesis 2 database. You can then replace the head morph in the Genesis 1 tab for that model with the same head morph that you just created. Repeat steps 1-4 for the Genesis 2 morph you are using for the body. This will allow you to use the same head morph you have and replace the default body morph for that model with the new Genesis 2 body morph that you just created. If you want to go back and re-make the head and body morphs you can use the Head and Body tab and choose the Head and Body tab from the Add Option menu. Then you will have the option to select the head and body morphs you want to re-make. For the Genesis 2 Morphs, in the Genesis 2 product line you have the ability to choose a morph for head, body and hands. If you don't have a body morph, then you need to create one. You can either do this in Genesis 2, or you can do it with another product line and import it into Genesis 2. Create a new morph set to the head, body and hands and call it Genesis 2. Change the colors to whatever 82157476af
